

# Strategies for **Cleaner Data**

How Smarter Data Strategies  
Solve Education's Toughest  
CRM Challenges

**Cassie Bruce**

**Client Integration Success Manager**

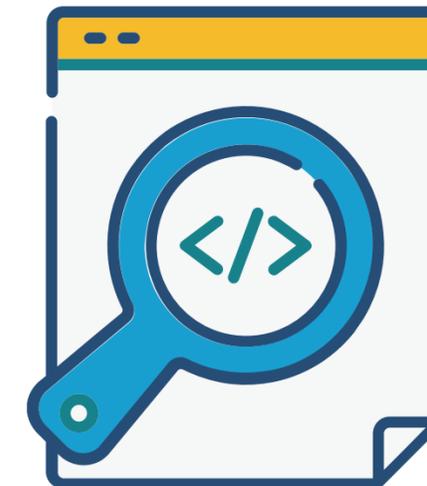

# Agile's Expected Outcomes

**Few Bad  
Records**

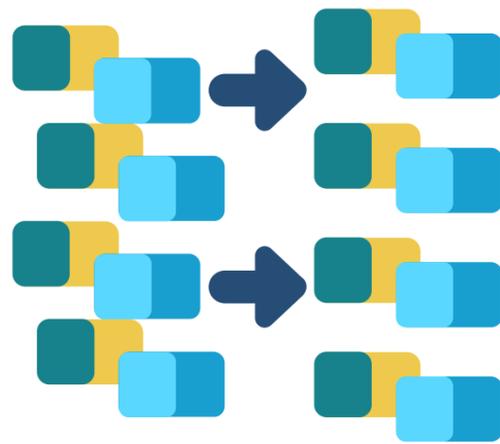

**Better Matching  
Across Systems**

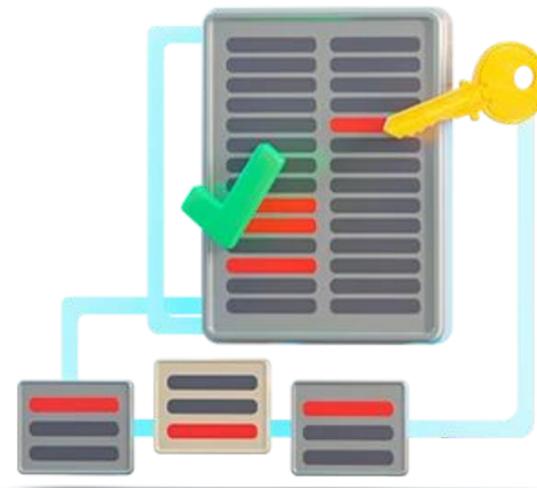

**Reliable  
Single View**

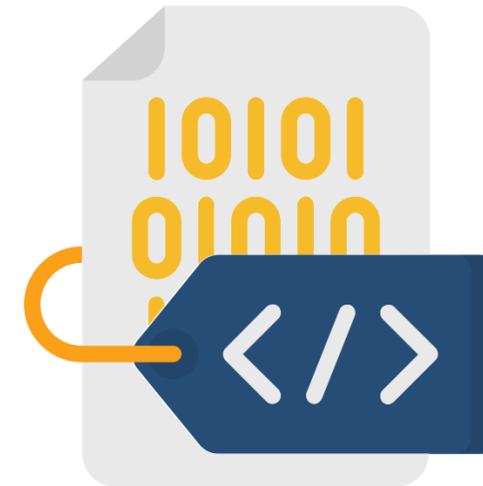

# Education Industry Issues

**Merging Data From  
Multiple Sources**

**Duplicated  
Data**

**Stale  
Old Data**

# CRM Data Considerations

- Why is education data so difficult to integrate and maintain accurately?
- What happens when multiple data sources don't align or share a common identifier?
- Can you trust your CRM when duplicate, mismatched, or stale records distort reporting and segmentation?
- Without a clear data strategy and authoritative education data source, how can you build a reliable, unified view across systems?
